INDEX—AUTHOR AND SUBJECT

Page

Abbott, R. C., M. J. Blish, and H. Platenius. The quantitative estimation of glutenin in wheat flour 129

Absorption

Tables for calculating to a 15% moisture basis. A. W. Meyer 68

Measuring with penetrometer. C. G. Harrel 283

Albumin of flour, preparation and analysis. W. F. Hoffman and R. A. Gortner 221

Alsberg, C. L. Starch in flour 485

Alsberg, C. L. and E. P. Griffing. The heat coagulation of gluten..... 411

Amino acids, estimation in wheat and flour. H. J. Denham and G. W. Scott Blair 58

A. O. A. C., collaboration with, R. Hertwig 474

Ash

Determinations, collaborative studies of methods. D. A. Coleman.. 317

In flour streams. E. P. Harding and George Dysterheft 47

In flour, contribution to the determination of. J. Micka 461

Bailey, C. H.

What progress are we making as cereal chemists 275

and R. A. Barackman. The rôle of phosphates in bread making... 400

and Emily Grewe. Relation of hydrogen-ion concentration of dough to baking properties 261

and R. C. Sherwood. Observations of baking tests 305

and Herbert Vogel. A study of durum wheats 136

Bailey, L. H. Comments on baking test 303

Bakery engineer, relation of work to that of flour mill chemist. E. B. Price 470

Baking properties and H-ion concentration. Emily Grewe and C. H. Bailey 261

Baking test

Some factors influencing. R. S. Herman and V. M. Hart 157

Interpretation of. L. W. Haas 389

Report of committee on standardization, M. J. Blish, Chairman.... 299

Factors affecting interpretation. M. J. Blish and R. M. Sandstedt.. 291

Basis for standardization. M. J. Blish 149

Baking value, determination of. Marcel Chopin 1

Barackman, R. A. and C. H. Bailey. The rôle of phosphates in bread making 400

Biscuits, measurement of volume. R. E. Lyons 481

Blair, G. W. Scott, and H. J. Denham. Estimation of amino acids and proteolytic activity in wheat and flour 58

and G. Watts and H. J. Denham. Effect of concentration on viscosity of flour suspensions 63

and G. Watts and H. J. Denham. Notes on the use of Ostwald viscometer for flour suspensions. 206

Blish, M. J.

A rational basis for the standardization of the experimental baking test. 149

and R. C. Abbott, and H. Platenius. The quantitative estimation of glutenin in wheat flour 129

and R. M. Sandstedt. Factors affecting interpretation of experimental baking tests 291

Book review. Bread Baking, by M. H. Joffe, reviewed by J. A. Dunn .. 435

Bread quality of, as influenced by application of nitrogen at different stages of growth. W. F. Gericke 73

Bread making, rôle of phosphates in. R. A. Barackman and C. H. Bailey.. 400

Buffer value, in testing flour. C. G. Harrel 423

Buyer of flour, value of laboratory report to. A. D. Wilhoit 492

Page
Calcium acid phosphate, neutralising value of. C. W. Herd 347
Calcium in flour streams. E. P. Harding and George Dysterheft 47
Cereal chemists, progress made by. C. H. Bailey 275
Chlorine, effect on gluten quality. T. R. James and J. X. Huber 454
Chopin, Marcel. Determination of baking value of wheat by measure of specific energy of deformation of dough 1
Chromate solutions for gasoline color value determinations. H. Jørgensen 468
Clark, R. J. Address of the president 327
Coagulation of gluten by heat. C. L. Alsberg and E. P. Griffing 411
Coleman, D. A. Report of the committee on methods of analysis for the American Association of Cereal Chemists 311
Color analysis of durum wheat flour. Herbert Vogel and C. H. Bailey.. 143
Deformation of dough, specific energy of, and baking value. Marcel Chopin. 1
Denham, H. J., G. W. Scott Blair, and G. Watts
Estimation of amino acids and proteolytic activity in wheat and flour 58
Notes on the use of Ostwald viscometers for flour suspensions.... 206
Effect of concentration on viscosity of flour suspensions 63
Density of wheat as influenced by freezing, stage of development, and moisture content. P. F. Sharp 14
Development of wheat and density. P. F. Sharp 14
Diastatic activity
and H-ion concentration. Emily Grewe and C. H. Bailey 263
and starch granules. Emily Grewe and C. H. Bailey..... 243
Dough, specific energy of deformation and baking value. Marcel Chopin 1
Drying, rate of, in wheat flour, starch, and gluten. E. A. Fisher 184
Dunn, J. A. Book review, Bread Baking by M. A. Joffe 435
Durum wheats, a study of. Herbert Vogel and C. H. Bailey 136
Durham, R. K. Secretary-treasurer's report 334
Minutes of 13th convention 333
Extensibility of doughs made with various types of wheat flour. Emily Grewe and C. H. Bailey 239
Extensimeter, and baking value. Marcel Chopin 1
Fat content of flour, estimation of. C. W. Herd 370
Ferrari, C. G. Report of the managing editor 336
First International Conference on Flour and Bread Manufacture. A. H. Johnson 495
Fisher, E. A. A study of the rate of drying of wheat flour, starch, and gluten 184
Flour, H-ion determination and buffer value in testing. C. G. Harrel .. 423
Flour, rate of drying. E. A. Fisher 184
Flour streams, iron, calcium, magnesium, phosphorus, ash, and protein content. E. P. Harding and George Dysterheft 47
Freezing, influence on density of wheat. P. F. Sharp 14
Gasoline color value, chromate solutions for. H. Jørgensen 468
Gericke, W. F. On the quality of bread from wheats supplied with nitrogen at different stages of growth 73
Globulin in flour, preparation and analysis. W. F. Hoffman and R. A. Gortner 221
Gluten
A study of the physical properties. T. R. James and L. X. Huber.. 449
heat coagulation of. C. L. Alsberg and E. P. Griffing 411
rate of drying. E. A. Fisher 184
Glutenin
Concentration in wheat flours. Emily Grewe and C. H. Bailey.... 230
determinations, collaborative studies of methods. D. A. Coleman.. 320
estimation in flour. M. J. Blish, R. C. Abbott, and H. Platenius . 129
Extraction from flour. P. F. Sharp and B. L. Herrington 254

Page

Gortner, R. A. and W. F. Hoffman. The preparation and analysis of the various proteins of wheat flour with special reference to the globulin, albumin, and proteose fractions 221
